

~TATYANA~

is a creation of

Fashion Dolls in Miniature

Fashion Dolls in Miniature

Materials needed:

- Doll body no 235 white hands.
- Gold colored trim for decoration.
- Gold eyelet trim.
- Gold jewellery findings for hat decoration.
- Ivory silk.
- Viscose for hair.
- Red Rhinestones.
- Fathers for hat.
- White batiste for drawers and underskirt.
- Pipe cleaners.
- Cardboard to make hat.
- Very fine gold chain.
- Piece of white/ivory boa.

Tools needed:

- Glue dispenser.
- Tweezers.
- Small scissors with fine tips.
- Super glue (ex. FX-BMI).
- White glue (ex. Aleene's Tacky-glue).
- Textile stiffener (Stiffen-Stuff).
- Needle and thread in colours matching the fabric.
- Doll stand.
- Textile wrap.
- Cork base or carton box to drape your skirt of doll.

Glue dispenser, doll stand, white glue, super glue and textile stiffener are available at Fashion Dolls in Miniature.

****REMARK**:** Shades of fabric, ribbons, trims, accessories can vary
According to availability.
But patterns remain the same.

Directions:

1. **Construction of the doll:** Construct your doll (see technique at the end of this booklet). To glue different parts of doll, you best use a mixture of white glue (ex. Tacky-glue and super Glue (ex. Sec 20).

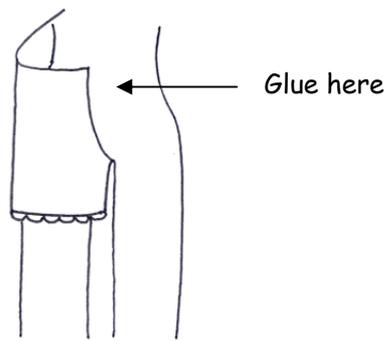

****ATTENTION**:** Don't glue hands on to the pipe cleaners yet. But you can glue pipe cleaners into the shoulders. It is easier to pull sleeves over pipe cleaners.

2. **Shoes:** The legs and shoes are pored in white porcelain. Paint shoes with colour of your wish. We painted shoes black and the gold painted buttons. As finish and to protect the painting, you cover the shoes with a supplementary layer of nail polish. Let dry well.

****HINT**:** If you use the Humbrol paint, it is not necessary to put a supplementary layer of lacquer.

3. **Drawers:** Cut pattern for drawers from white batiste or cotton. Glue lace on hem of drawers.
Close inside seam.
Gather waist and pull on doll. Put a line of glue under the doll's waist and push carefully drawers in place (see picture one next page).

****Option**:** Gather lace on each leg. Make a bow with a ribbon of your choice and glue to decorate your drawers.

4. **Underskirt:** Made from batiste or fine cotton.
 Cut pattern for underskirt from white batiste or fine cotton.
 Cut a rectangle 30 cm. of 1.5 cm. Put edging lace on one long side. Gather other long side and glue or glue on underskirt.
 Gather waist and pull on doll. Fix in place just **UNDER** waist.
5. **Skirt:** The skirt exists out of 2-layer first or bottom layer and top layer.
 Both are decorated with wide gold trim and eyelet picot.
 Cut the patterns for both pieces out of ivory silk.
- The first layer** as well as the second are rectangular pieces.
 Glue hem to front (to good side but as narrow as you can).
 Glue your eyelet trim on front (just on top of hemline, to cover the raw edge).

Protect your work surface with a piece of plastic. Spread glue all over wide gold trim. (Same width, as your skirt).

Glue this now just above the gold eyelet trim of your skirt.

Check if everything is firm glued in place before going to the next step. Put more glue on where necessary.

Pleat your skirt in large size.

Glue back centre seam.

Sew or glue in place under the waist **ONTO** the underskirt.

Second and shorter layer: Repeat the way of working like you did with the first and long layer.

Pull on doll and sew/glue in place (waist). Make creases where necessary to have a little bit of movement. Spray with fabric stiffener. Let air dry or use your hair dryer.

6. **Jacket:** Reinforce front and back with reinforcement. (This is in the kit available). Take care you iron the glue side onto the silk. Otherwise it will stick on your iron.

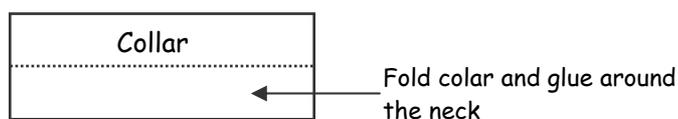

Cut pattern pieces for jacket out of reinforced ivory silk.

Sew shoulder pieces.

Try on doll and make some alterations if necessary.

Take the jacket of the doll and sew the side seams.

7. **Collar:** Cut the collar out from ivory silk. Glue in half and glue around the neck of the doll.

8. **Front closing:** Glue one side of front centre seam to inside.

Glue also bottom hem of jacket to wrong side.

Now put your jacket on the doll. Close front by gluing not finished edge under finished edge.

9. **Sleeves:** Cut sleeves from ivory silk.

Put doll's hands onto your pipe cleaners and measure sleeve length. Turn hem to inside. Take your doll's hands off again.

Pull a gathering tread on top of sleeve.

Sew long side seam. Pull sleeve onto doll. Pull gathering tread a little bit. Now with your tweezers fold the

wrong side to inside de sleeve and sew gently sleeve into sleeve hole. Beginning under the arm.

You can also put a very fine line of tacky glue around the armhole (make a mark before hand) and push the sleeve in place.

Glue hands onto your pipe cleaners.

Decorate bottom hems sleeve with pieces of white boa or fur.

10. Finishing and decoration of the jacket:

Take two pieces of your large gold decoration and glue in front of your jacket.

Glue eyelet gold trim on waist. Glue chain in place. Glue red rhinestones on collar.

11. **Hair:** We take a small piece of pleated hair (pleated in the medium or small pleater). Just put glue around the head and push the small piece of hair from ear to ear. Spread out to the back.

She has short hair, so it does not have to come lower than the ears.

12. **Hat:**

Hat brim: Cut pattern pieces for hat out of cardboard. Glue the pattern piece from ivory silk on it. Gluing silk to wrong side of cardboard.

For back center seam you turn one end to wrong side and glue finished side over not finished side.

Round tip: Cut 1 time from cardboard and the bigger pattern from silk. Give small cuts where indicated. Let dry and then glue top of hat onto the hat brim.

Decorate with feathers and rhinestones.

Glue rhinestones in jewellery finding and glue on hat. Put hat on dolls head. When satisfied with position glue in place.

13. Luggage:

Used materials:

- Pattern included.
- Gold penn.
- 2 gold coloured rings.
- Small gold coloured jewellery findings for locks of luggage.

Used tools :

- X-o Knife.
- Gold penn.
- Pergamo pen.

Directions:

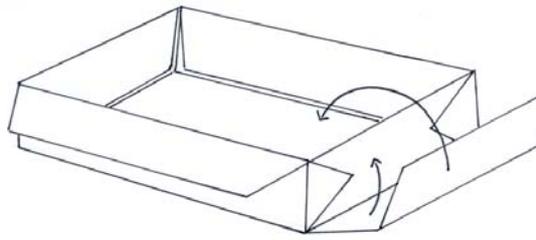

You will find in the back of the booklet helpful drawings to assemble the luggage.

- **Base and lid:**

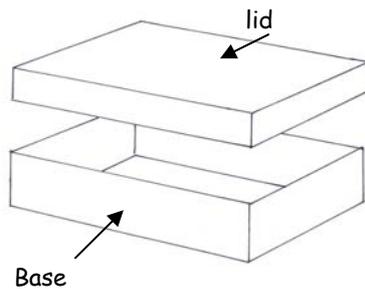

Cut both designs out (base and lid) and crease the lines as indicated with your Pergamo pen. Fold the sides upright, so you make a 90° corner. Glue. This are only the 2 bases and will be covered with an outside patterned paper. (If you wish you can use your own fine leather or imitation leather).

- **Patterned outside:**

Cut the outside of luggage and cover the folding lines again with your Pergamo pen. Cover and glue now (look at drawing) this around lid and base.

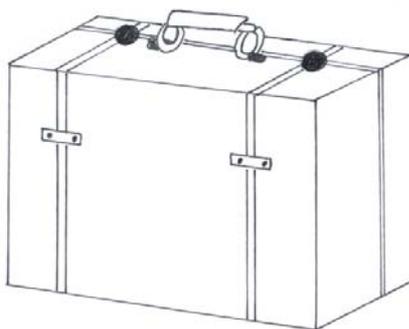

When the 2 parts are ready and dry, glue them together (see drawing).

Glue the two parts together

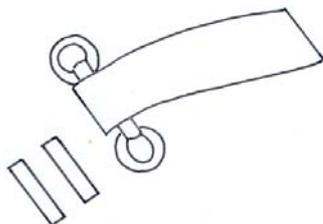

- **Hinge:**
Cut a small strip for hinge out of patterned paper and glue this on the under side or bottom of the luggage.
- **Belts:**
Cut small strips for belts. Glue these 2 belts around luggage about 1 cm of each side. Cut two tiny rectangular from brown paper which you glue over the belts.

Put two gold dots on this brown paper to simulate nails.

You can use the left over from the belt to make the handle of the luggage (see directions handle).

- **Handle:**
Cut the parts for the handle. Make the handle like indicated on the drawing. Turn and turn the paper around the rings until you are satisfied with the strength of the handle. Glue handle on to the luggage: Put the two small strips of paper through the rings and glue them on to the luggage.

- **Decorative corners:**

As finishing touch you cut 8 small rounds and cut them as indicated **not further**.

(Look at drawing).

Glue and fold in each corner of luggage.

- **Lock:**

Glue the two jewellery findings on to the luggage to simulate 2 locks.

Together with my team I wish you a lot of creation fun with "Tatyana".

Doll Body Construction arms and legs.

- Pipe cleaners
- Elastic gauze wrap
- Tacky-gluе
- Super glue

Twist 2 pipe cleaners together. Bend these in $\frac{1}{2}$ leaving a small hole

If you have a head and shoulder plate or making solid if you have a porcelain bust. Twist again to an imaginary crotch, separating pipe cleaners into two legs. Set

Head and bust on top of pipe cleaners, and feet onto end of legs. Measure 13.5 cm. - 14 cm. tall for a woman and 15 cm for a man.

Gently cut off excess from legs until desired height is met. Glue head and bust and feet to pipe cleaners (as shown in diagram) with mix of Tacky-Glue and super glue (Sec 20).

****HINT****: Put a large drop of Tacky-gluе into hole, and add a drop of super glue on top for extra holding power. I use this for all my porcelain, pipe cleaner assembly.

For head and shoulder plate take 2 pipe cleaners and fold in half. Twist these together and insert in opening for body or shoulder plate.

Next bend down the arms to the imaginary top of thigh (if in doubt about proportion look in the mirror and see where your hand falls naturally on your leg). Cut off end of pipe cleaners until hand and arm falls at desired length. Attach with glue mix.

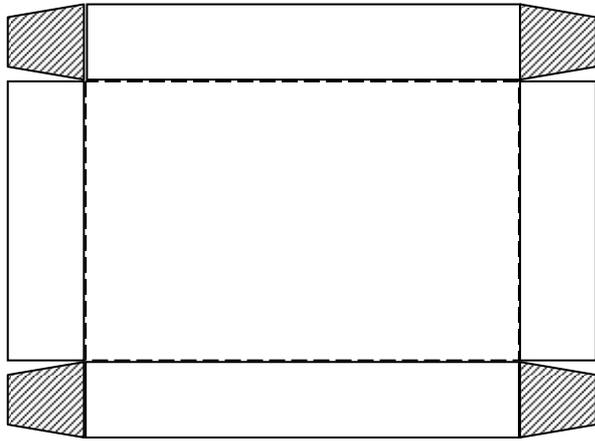

After being satisfied with height of doll, wrap body with elastic gauze wrap until you achieve desired form.

Secure ends with Tacky-glue as needed.

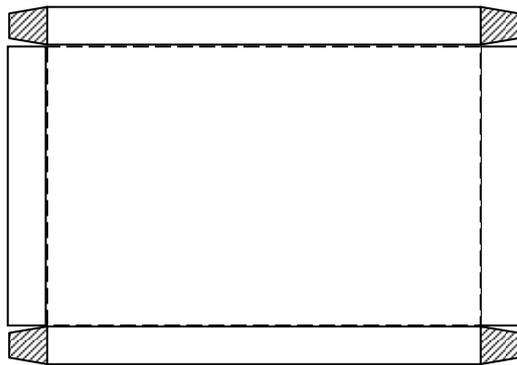

Basic Wiggling.

Put glue all over dolls head, following basic hairline. Follow diagram below to gently place on hair, and pull up in a top notch. Curls are made by winding around a size 00 knitting needle or T-pin (mist hair section and let dry after winding). For specialised directions, we offer our Art of Dressing Hair booklet. This comes in kit form, complete with curling needles, pleater for wavy hair, 3 bags of hair and book.
